Re: (687) From User Feedback to Home Deployment: Designing a Virtual Human App for Older Adults with Mild Cognitive Impairment Yuan Gao, Ngaire Kerse, Derek Orbaugh, Elizabeth Broadbent

Dear Yuan Gao, Ngaire Kerse, Derek Orbaugh, Elizabeth Broadbent:

It is our pleasure to inform you that your paper above has been accepted as Late Breaking Report for presentation at the 35th IEEE International Conference on Robot and Human Interactive Communication (RO-MAN 2026), Aug 24 - Aug 28, 2026 to be held in Kitakyushu, Japan.

Papers submitted to LBR will not be published in any form.

Therefore, there is no need to prepare a final draft.

Metadata such as the title and list of authors will be included only in the program.

LBR presentations will consist of flash talks lasting no more than 3 minutes and poster presentations. Please refer to the program information, which will be released shortly, for details.

Our conference policy requires that at least one author of each accepted paper register for the conference. Each paper must be covered by one full conference registration under one of the following categories: IEEE Member, IEEE RAS Member, RSJ Member, KROS Member, Non-Member, Student Member, Student RAS Member, or Student Non-Member.

The deadline for early registration is approaching. Please visit the website (<https://ro-man2026.org/registration/>) for details.

One full registration covers one paper submission. If an author has multiple accepted papers, additional papers beyond the first one must be registered as "Additional Papers," with an additional fee of USD 450 per paper. Additional paper registrations are valid only in conjunction with an active full registration.

If you or your co-authors anticipate any difficulties with

registration or resenatation, please contact us at
info@ro-man2026.org.

Congratulations once again!

Sincerely,

Kazuhiro Nakadai, Georgia Chalvatzaki, and Zhi Zheng,

Program Chairs

Shuhei Ikemoto, Heni Ben Amor,

LBR Chair
